

## STRENGTHENING MISSION-CRITICAL NETWORKS ... SAFEGUARDING INNOVATION

On January 21, 2026, Stran Technologies IT Services merged with AllCom Global Services LLC to form STRANTECH, which delivers design, engineering, implementation and maintenance of secure and resilient mission-critical technology infrastructure solutions to the U.S Government and commercial customers worldwide.

We hold a Department of Defense top-secret security facility clearance and employ a large, specialized technical workforce with U.S. Government-administered security clearances. We also maintain appropriate levels of cyber and information security protocols, including Cybersecurity Maturity Model Certification (CMMC) requirements.

STRANTECH provides full-service expertise, products and capabilities to ensure your IT infrastructure can meet the current and future demands of the critical systems and missions you support. Driven by multi-domain professional engineering, we deliver design, mechanical, electrical and telecommunications capabilities to customers globally. In addition, we are a leading provider of secure construction, facilities fit-out and data center solutions for the national security and hyperscale computing customer.

## EXPERTISE, RESULTS, QUALITY AND VALUE

With more than 30 years of critical technology infrastructure solutions expertise, STRANTECH professional engineers cross-multiple disciplines including civil, electrical, mechanical, structural and telecommunications.

We also have subject matter experts specializing in critical infrastructure requirements such as data center, power engineering, precision cooling and various communication and networking technologies. Our engineers are supported by a robust and specialized logistics and procurement function, as well as professional program management and coordination.

STRANTECH understands that the protection of our nation's critical infrastructure is vital to national and economic security, and the well-being of every citizen. We are committed to delivering reliable, secure and high-quality services through disciplined processes, continuous improvement and a culture of accountability.

Our quality management approach, driven by ISO 9001:2015, is aligned with industry best practices and regulatory requirements. We maintain documented policies and procedures that govern service delivery, program and project management, risk mitigation and incident response to ensure consistency and compliance across all operations.

## SUCCESSFUL PAST PERFORMANCE AND PARTNERSHIPS

By combining the industry-leading expertise and capabilities of AllCom Global Services LLC and Stran Technologies IT Services, STRANTECH has successfully delivered solutions and projects on a global scale for U.S. Government customers and large multinational corporations for over three decades.

Our diverse customer base includes regulated environments, commercial enterprises and public sector organizations. Our experience allows us to meet a wide range of operational, compliance and service delivery requirements and to draw from real-world experience – strengthening our ability to deliver resilient, scalable and innovative solutions.

STRANTECH has been a valued partner to the U.S. Government and our nation's top system integrators – building, maintaining and securing national security mission-critical information and infrastructure for the U.S. Army, U.S. Navy, U.S. Air Force, U.S. Marine Corps, Defense Information Systems Agency, Department of Homeland Security, NASA, National Geospatial Intelligence Agency, Army National Guard, Department of Justice, Department of Veterans Affairs, U.S. Postal Service and numerous other federal agencies.

Our global support includes successful projects across the continental U.S., Hawaii, Germany, Japan, South Korea, Guam, Italy, Greece, Spain, Diego Garcia, United Kingdom, Bahrain, Kuwait, United Arab Emirates, Saudi Arabia, Qatar and Kwajalein Islands.

### Licenses & Certifications

- ✓ ISO 9001:2015 Certified
- ✓ UL Registered Firm
- ✓ AS9100 Registered
- ✓ ANAB Registered
- ✓ PMI Certifications
- ✓ HSPD-12 Service Provider
- ✓ Systems Engineer ICAM PACS (CSEIP)
- ✓ BICSI RCDD
- ✓ BICSI Certified Technicians

### Prime Contracts

- ✓ GSA MAS: 47QSWA-19-D-004F
- ✓ U.S. Air Force Power Conditioning Continuation and Interfacing Equipment (PCCIE) MAC III
- ✓ Defense Logistics Agency, Network Infrastructure Support Services (NISS) IDIQ

### Locations

- ✓ Headquarters  
10790 Parkridge Blvd., Suite 350  
Reston, VA 20191  
888.308.1810
- ✓ St. Louis, Missouri  
201 Stag Industrial Blvd.  
Lake St. Louis, MO 63367  
888.308.1810
- ✓ Naugatuck, Connecticut  
39 Great Hill Road  
Naugatuck, CT 06770  
203.729.2572

## SOLVING COMPLEX CHALLENGES AND DELIVERING SEAMLESS SUPPORT THROUGH THE PROJECT LIFECYCLE

### Data Center Solutions

Industry-leading infrastructure technologies and products for critical missions, such as modernizing and relocating secure data center facilities for the military and intelligence communities:

- ✓ Data Center Assessment
- ✓ Infrastructure Engineering/Design
- ✓ Thermal Management
- ✓ Network/Facility Cooling Systems
- ✓ Power Distribution
- ✓ Fire Suppression
- ✓ Environmental Monitoring
- ✓ Physical/Electronic Security
- ✓ Racks, Cable Ladder, Conveyance Systems
- ✓ Preventative Maintenance

### Specialized Construction

Turnkey design/build services to meet sophisticated technology infrastructure requirements:

- ✓ Design/Engineering/CAD
- ✓ Project/Site Management
- ✓ Design, Build or Remodeling
- ✓ Communication Shelters
- ✓ NOCs and Data Centers
- ✓ Huts/Vaults, SCIF
- ✓ Power Systems
- ✓ Grounding
- ✓ UPS/Generators
- ✓ Mechanical/Electrical
- ✓ Plumbing Systems
- ✓ Fire Suppression
- ✓ Environmental Monitoring
- ✓ Site Physical Security
- ✓ Site Preparation

### Telecom & Wireless

Integrated services providing seamless, secure communications with customized and high-speed networks:

- ✓ Design, Build, Operation and Maintenance
- ✓ Voice, Data and Wireless Networks Integration

### Power Systems

Customized power system solutions to achieve operational functionality, enhanced resilience, reliability, and energy efficiency and diversity:

- ✓ Design/Engineering
- ✓ AC UPS and Buss Systems
- ✓ DC Power Plant
- ✓ Batteries, Rectifiers, Inverters
- ✓ ATS
- ✓ Power Distribution Units
- ✓ Grounding
- ✓ Lighting
- ✓ Fault Protection Subsystems
- ✓ Backup Generators/UPS
- ✓ Advanced Fuel Cell Engines

### International Secure Construction

Partnerships with large U.S.-based construction firms to complete work requiring Cleared American Workers (CAW) for sensitive U.S. Government facilities located domestically and internationally:

- ✓ Program Management/Engineering
- ✓ Environmental/Mechanical Systems
- ✓ Plumbing/Electrical Systems, Fire Protection
- ✓ Interior Finishes/Equipment
- ✓ Threat Mitigation/Security Systems
- ✓ Technical Professional Services

### Unified Communications

Design/build solutions across multiple critical infrastructure technologies in support of unified communications systems:

- ✓ Central Office Planning/Layout & Design (Turnkey CO Builds)
- ✓ DWDM Installs/Tune-Up
- ✓ GPON, VoIP Infrastructure & Cutover Support
- ✓ Integrated Alarm Systems MDF/IDF, System Cutover
- ✓ Racks, Cable Ladder

### Cable Plant Infrastructure Design & Installation

Design, installation and maintenance of cable infrastructure systems with flexibility and scalability to meet evolving enterprise requirements:

- ✓ ISP/OSP Construction and Cabling (Copper/Fiber)
- ✓ Structured/Bundled Fiber Installation/Maintenance
- ✓ Facilities/Electrical WAN Circuits and Wireless LAN
- ✓ Protected Distribution Systems for SIPRNET

### HVAC & Advanced Cooling

Systems designed to improve energy efficiency, reliability and environmental performance across mission-critical environments:

- ✓ Design/Engineering
- ✓ Computer Room Air/Perimeter
- ✓ Cooling
- ✓ High Density Cooling/Chilled Doors
- ✓ HAC/CAC
- ✓ Mechanical Engineering
- ✓ Plumbing and Distribution Systems

### Facilities & Infrastructure Maintenance Services

Technical expertise deployed at customer sites to support and maintain mission-critical infrastructure:

- ✓ ISP, OSP, Data Center, Power and Mechanical
